

Kingfishers – Remote learning

Writing Task

Watch the following video: https://www.youtube.com/watch?v=9uhM_SUhdaw

Task 1: Think about the characters feelings at each part of the film. Create a feelings graph and label it to show the events at high and low points.

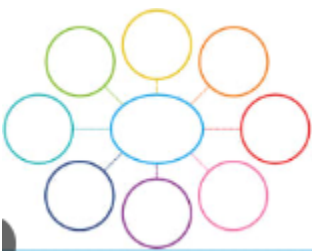

Task 2: Write a paragraph telling the next part of the story.

He has tried all these ways to get out... now he has a new challenge so what will he do?

Reading Task

Task 1 – Using your school reading book (or one you are reading at school) Create a summarising brainstorm telling me as many facts as you can about the main character.

You could draw your character in the middle first, then surround it by the information.

Task 2 – Read the next chapter (few pages) of your book. Before you read any more write a prediction paragraph about your story.... What will happen next? Use what you know of the story so far to help you. Why do you think this will happen?

“I predict.....”

“I think this will happen because.....”

Maths Task

Task 1

How many shapes can you make with an area and perimeter of 20?

Hint: You can use diagonal lines to help.

Remember that the perimeter is the measurement around the edge of a 2D shape and the area is the measurement of the space taken up by a 2D shape, usually measured in square units, such as cm^2 .

Task 2

If the answer is 256, what could the equation be?

For example: $257-1=256$.

What are the most complicated equations you can come up with?

Task 3

Design a maths poster that will help your classmates understand a tricky maths idea.

Hint: Include pictures and a step-by-step example that explains your strategy.
